MARKET ENTRY ADVISORY

ENTERING NAMIBIA WITH CONFIDENCE

**Dynasty Global Consulting – Your Strategic Market
Entry Partner**

Supporting international investors and businesses entering Namibia through practical advisory, regulatory coordination, operational setup, and long-term strategic support.

WHY NAMIBIA

Why Invest in Namibia?

Namibia stands at a compelling inflection point. With extraordinary natural resources, a stable democratic system, and a strategic Atlantic seaboard position, the country offers a strong investment case for businesses seeking long-term growth in Southern Africa.

Strategic Location

Atlantic seaboard gateway to SADC markets, anchored by the deepwater port at Walvis Bay

Political Stability

One of Africa's most stable democracies with a transparent, investor-friendly legal framework

Resource Wealth

World-class deposits in oil & gas, uranium, diamonds, lithium, and rare earth minerals

Energy Transition

A global leader in green hydrogen potential with the flagship Hyphen Hydrogen Valley project

- 📘 Namibia is one of Africa's most stable and investor-ready markets – and the window of opportunity is open now.

The Challenges of Entering a New Market

Even in investor-friendly markets, entering a new market requires careful navigation of regulation, local requirements, and commercial realities. Without local expertise, small missteps can quickly become costly delays.

Regulatory Complexity

Navigating BIPA, NamRA, sector-specific licensing, and ministry approvals.

Local Content

Understanding and complying with Namibianisation policies.

Stakeholder Navigation

Identifying and engaging the right government and commercial stakeholders.

Operational Setup

Establishing banking, HR, office infrastructure, and supply chains.

Market Intelligence

Understanding local commercial dynamics, pricing, and competition.

- ❑ Without the right local partner, these challenges can translate into costly delays, compliance failures, and missed opportunities.

Comprehensive Market Entry Support

Dynasty Global Consulting provides end-to-end market entry advisory and implementation services tailored to the specific needs of international investors, multinational corporations, and institutional stakeholders entering Namibia.

Key Services

- Company Registration
- Regulatory Licensing
- Tax & Banking Setup
- Office & Infrastructure
- Stakeholder Engagement

Advisory Services

- Market Entry Strategy
- Growth Advisory
- Local Content Compliance
- Sector-Specific Advisory
- Ongoing Operational Support

✓ Dynasty Global Consulting provides end-to-end support – from initial market assessment through to sustained operational growth.

Supporting Strategic Growth Sectors

Namibia's economic landscape is defined by a set of high-value, capital-intensive sectors that are attracting growing international attention. Dynasty Global Consulting has developed deep sector-specific knowledge across Namibia's most strategically significant industries, enabling our clients to enter these markets with contextual intelligence, relevant networks, and proven establishment methodologies. We do not apply generic templates – every engagement reflects the particular regulatory, commercial, and operational dynamics of the sector in question.

Oil & Gas

Comprehensive support for offshore supply chain participants, service companies, equipment providers, and investors engaged with Namibia's Orange Basin developments. We facilitate regulatory navigation, local content compliance, and stakeholder engagement with TotalEnergies, Shell, and relevant government bodies.

Mining & Critical Minerals

Establishment advisory for mining service companies, equipment suppliers, and investors operating in uranium, diamonds, copper, lithium, and rare earth sectors. Support includes Environmental Compliance Certificates, Mining Act compliance, and MEFT engagement.

Logistics & Transportation

Strategic support for logistics operators, freight forwarders, port services firms, and transportation companies seeking to leverage Walvis Bay and the Trans-Kalahari Corridor as a gateway to landlocked Southern African markets.

Renewable Energy

Advisory services for solar IPPs, green hydrogen developers, and energy infrastructure investors navigating REFIT frameworks, NAMCOR engagements, and Ministry of Mines and Energy licensing – including support for the flagship Hyphen Hydrogen Valley and related supply chain opportunities.

Manufacturing

Industrial establishment support for manufacturers seeking to leverage Namibia's Export Processing Zones, SEZ incentives, and competitive utility costs. Assistance spans site identification, EPZ registration, and operational readiness planning.

Professional Services

Business establishment and market integration services for professional services firms – including legal, financial, engineering, and consulting practices – seeking to formalise their presence and build credible local market positions in Namibia.

Our Proven Market Entry Process

Dynasty Global Consulting's market entry framework is the product of extensive experience working with international clients across Namibia's most complex and competitive sectors. It is a structured, phased methodology that provides clarity at each stage of the establishment journey – from initial market assessment through to sustained operational growth. Each phase is sequenced to build upon the last, ensuring that our clients advance through the process with confidence, compliance, and strategic momentum.

Phases 1–3: Foundation

The first three phases establish the strategic and regulatory foundation for successful market entry. Discovery and Assessment involves a comprehensive analysis of the client's objectives, sector context, and Namibian market conditions. Market Entry Strategy translates this intelligence into a clear roadmap – covering corporate structure, regulatory sequencing, and stakeholder engagement priorities. Regulatory Navigation then executes this roadmap through direct engagement with relevant ministries, statutory bodies, and licensing authorities.

Phases 4–6: Execution & Growth

Business Establishment encompasses all legal, administrative, and compliance activities required to formally incorporate the client's presence in Namibia – including company registration, tax enrolment, and banking establishment. Operational Readiness ensures that the physical and logistical prerequisites for commencing operations are in place – from office setup and staff mobilisation to supplier onboarding. Growth and Expansion Support provides ongoing strategic advisory as the client scales, deepening market position and extending operational capability over the medium to long term.

Your Trusted Local Partner

In any market, success depends on more than ambition – it depends on local knowledge, trusted relationships, and the ability to navigate the environment with confidence. Dynasty Global Consulting gives international investors and corporations a deeply networked Namibian partner focused on practical results.

Local Knowledge

Deep understanding of Namibia's regulatory environment, commercial landscape, and government stakeholders built through direct experience.

Established Networks

Direct relationships with BIPA, NamRA, relevant ministries, sector regulators, and key commercial players across Namibia's priority sectors.

Proven Track Record

A demonstrated history of successfully guiding international clients through Namibia's market entry process from registration to operational readiness.

- ❑ Dynasty Global Consulting was established specifically to bridge the gap between international ambition and Namibian market reality.

Ready to Establish Your Presence in Namibia?

Whether you are exploring opportunities in energy, mining, logistics, manufacturing, infrastructure, or professional services, Dynasty Global Consulting can help you establish and grow your presence in Namibia with confidence.
